Recommendations

1. I recommend a house buyer within the U.S to consider investing in housing within the following regions: Freedom, NY:14065, Cincinnatus, NY:13040,Oyster Bay, NY:11771,Winfield, NY:13491,12154 Schaghticoke, NY:12154
2. For investors with high incomes, they can consider to diversify their investments within those major cities. By this they will be minimizing the risks of their investment portfolio and also staking on high ROI cities.
3. Investors can utilize the analysis to evaluate risks of any other region they may be interested in investing. The metric for risk assessment is the coefficient of variation (CV) which should be low.
4. Investors should give cities or regions with high Return on investment top priority when considering their investment choices.
